Concerns: Products of Fagron Deux Acren

Dear,

- To our knowledge, the raw materials we deliver are not considered as GMO (genetically modified organisms). We have never received any warning, neither any negative directive from the competent services or regulatory bodies concerning limited import or merchandising these products on the European market.
- This is to certify that all products are manufactured without use of raw materials of animal origin. Therefore, the BSE/TSE issue does not concern our products to the best of our knowledge.
- Pesticides/ heavy metals/ mycotoxins comply to legally fixed limits according to European laws and directives.
- No irradiation is performed on our products.
- Use of our products is the entire responsibility of our customers.

Kindest regards,

Phebe De Coene
Quality Assurance Officer
