

*Belgian Malts that Make Your Beer So Special*

# ORGANIC TARGET

## **BREWING QUALITY**

An excellent high alpha variety which gives bitterness at a very competitive price. Tends to be too harsh for aroma purposes late in the boil but has produced very good results when used as dry hop pellets in the cask.

## **ORIGIN / HISTORY**

UK origin. Target was released in 1972 and was the first result of a Wye College breeding programme to produce a wilt tolerant high alpha variety. It has rapidly established itself as the most widely grown English variety, with nearly half of the market.

## **AGRONOMICS**

Susceptible to downy mildew but has good resistance to both powdery mildew and Verticillium Wilt.

## **ACID COMPONENTS**

Alpha Acids	8 – 13% w/w
Beta Acids	4.5 – 5.7% w/w
Cohumulone	37% of alpha acids

**T90 Hop Pellets**

## **OIL COMPONENTS**

Total Oil	1.2 – 1.4 mls/100 grams
Caryophyllene	10% of whole oil
Farnesene	0.03% of whole oil
Humulene	21% of whole oil
Myrcene	45% of total oil

**Leaf Hops**

**Possible Substitutions:** Pilgrim, Admiral, Magnum
