

SAFBREW BE-256

Ingredients : Yeast (*Saccharomyces cerevisiae*), emulsifier E491

FERMENTIS

Active dry yeast recommended to brew a diversity of beers amongst which abbey style beers known for their high alcohol content. It ferments very fast and reveals subtle and well-balanced aromas.

To maintain the aromatic profile at the end of the fermentation, we do recommend to crop the yeast as soon as possible after fermentation.

TOTAL ESTERS

ppm at 18°P at 20°C in EBC tubes

TOTAL SUPERIOR ALCOHOLS

ppm at 18°P at 20°C in EBC tubes

MALTOTRIOSE

* corresponds to an apparent attenuation of 82 %

FLOCCULATION

FERMENTATION TEMPERATURE: 12-25°C (53.6-77°F) ideally 15-20°C (59-68°F)

DOSAGE INSTRUCTIONS: 50 to 80 g/hl in primary fermentation
2.5 to 5g/hl in bottle conditioning

REHYDRATION INSTRUCTIONS

Sprinkle the yeast in minimum 10 times its weight of sterile water or wort at 27°C ± 3°C (80°F ± 6°F). Leave to rest 15 to 30 minutes. Gently stir for 30 minutes, and pitch the resultant cream into the fermentation vessel.

Alternatively, pitch the yeast directly in the fermentation vessel providing the temperature of the wort is above 20°C (68°F). Progressively sprinkle the dry yeast into the wort ensuring the yeast covers all the surface of wort available in order to avoid clumps. Leave for 30 minutes, then mix the wort using aeration or by wort addition

TYPICAL ANALYSIS:

% dry weight:	94.0 - 96.5
Viable cells at packaging:	> 6 x 10 ⁹ /g
Total bacteria*:	< 5 / ml
Acetic acid bacteria*:	< 1 / ml
Lactobacillus*:	< 1 / ml
Pediococcus*:	< 1 / ml
Wild yeast non <i>Saccharomyces</i> *:	< 1 / ml
Pathogenic micro-organisms:	in accordance with regulation
*when dry yeast is pitched at 100 g/hl i.e. > 6 x 10 ⁹ viable cells / ml	

STORAGE

During transport : The product can be transported and stored at room temperature for periods of time not exceeding 3 months without affecting its performance.

At final destination: Store in cool (< 10°C/50°F), dry conditions.

SHELF LIFE

24 months from production date. Refer to best before end date printed on the sachet.

Opened sachets must be sealed and stored at 4°C (39°F) and used within 7 days of opening. Do not use soft or damaged sachets.

Fermentis dry brewing yeasts are well known for their ability to produce a large variety of beer styles.

In order to compare our strains, we ran fermentation trials in laboratory conditions with a standard wort for all the strains and standard temperature conditions (Saflager : 12°C for 48h then 14°C / Safale & Safbrew : 20°C). We focused on the following parameters: Alcohol production, residual sugars, flocculation and fermentation kinetic.

Given the impact of yeast of the quality of the final beer it is recommended to respect the recommended fermentation instructions. We strongly advise users to make fermentation trials before any commercial usage of our products.
