

Belgian Malts that Make Your Beer So Special

Belgian Wheat Beer

ABV 5.5%

Color 8 EBC

Bitterness
28 IBU

Description

Belgian Wheat Beer is traditionally considered to be a summer drink. It is usually consumed as an aperitif with a slice of orange or lemon.

Service:

Glass: Pint Beer Chalice
Temperature: 4-8 °C

BREWER'S TIP

For better filtration, add 1-2% Rice hulls.

To promote a good banana aroma, under pitch slightly (0.5g/L), low or no aeration, no head pressure, and ferment at high temperatures (22-26 °C).

To promote clove-like aroma, as WB-06 is a POF+ yeast strain, do the opposite. And to boost it, do a ferulic acid rest in the mashing.

This recipe is provided by Castle Malting®. Please note that this recipe is just a guideline. Some modification might need to be done to meet different technologies, efficiencies and ingredients yield as grain dry extract and hop alpha acid percentage.
