BELMA

BREWING QUALITY
A brand new and very unique hop. A Dual-Purpose variety. A very clean hop, with a very orange, slight grapefruit, tropical pineapple, strawberry, and melon aroma. Belma is relatively rich in esters which means that Belma has a fruity aroma. The floral fraction consists mainly of β-myrcene. This compound covers about 88% of the floral fraction, and 66% of the total amount of hop oil compounds determined.

ORIGIN / HISTORY
Belma is a new hop variety exclusively grown at Puterbaugh Farms.

ACID COMPONENTS
