

Belgian Malts that Make Your Beer So Special

ORGANIC CASCADE **(NEW ZEALAND)**

BREWING QUALITY

This hop displays quite exceptional levels of citrus moving more toward grapefruit characteristics. Works very well when matched up with some of the New Zealand aroma heavy weights such as Motueka or Riwaka. Typically employed in “new world” style pale ales creative brewers are also adding late into summer ales where its hallmark refreshing citrus aroma and oils profile give a refreshing summery finish.

ORIGIN / HISTORY

New Zealand Cascade features largely the same pleasant and distinctive characteristics enjoyed by its US twin but are higher in alpha acids. Some dispute this comparison however, noting that while its characteristics are similar, New Zealand grown Cascade is more subdued in both flavor and aroma.

ACID COMPONENTS

Alpha Acids	6-8% w/w
Beta Acids	5-5.5% w/w
Cohumulone	21-24% of alpha acids

Type T90 Hop Pellets

OIL COMPONENTS

Total Oil	1.1 ml/100 g
